Education

Imperial College London

MEng Computing with Artificial Intelligence

Sep 11 – Jul 15 | London, UK

- Overall Grade: **First Class (70.4)**

Relevant courses: Software Engineering, Network Security, Advanced Databases, Machine Learning, Cryptography Engineering

Kykkos A' Lyceum

Sep 06 – Jun 09 | Nicosia, Cyprus

- Apolytirion: **19.9 / 20**

Key subjects: Computing, CISCO Networks (CCNA), Mathematics, Physics

Certifications and Technical

CARTS (Certified AWS Cloud Red Team

Specialist), certified since June 2023

(ID: ARTL-9071)

OSCP (Offensive Security Certified

Professional), certified since May 2017

(ID: OS-101-07493)

Other Technical: Terraform, Python, TypeScript, AWS, CTFs, Docker, Ansible, Networking (CCNA 1&2), Git, Agile

Languages: Greek (native), English (Full Professional Proficiency)

Work Experience – Projects

Resonance Security – Senior Cybersecurity Engineer

Jan 24 – Feb 26 | Remote

- Led Phishing Campaigns and executed web, cloud, network and mobile application penetration tests
- Development of Resonance Platform and tools for Phishing Campaigns and Asset Monitoring, including an AI-powered anti-phishing web extension

Allendeaux – Senior Cybersecurity Engineer

June 23 – Jan 24 | Remote

- Organization and execution of web, cloud, network and mobile application penetration tests
- WebRTC and SIP security hardening

Halborn – Offensive Security Engineer

Feb 22 – Jan 23 | Remote

- Member of the Web and Cloud team | Pentesting/auditing Web2 applications and infrastructure (AWS)
- Focused on auditing web services and TypeScript applications, mainly crypto wallet Browser Extensions

Odyssey Cybersecurity – Senior Cybersecurity Analyst

Oct 17 – Feb 22 | Cyprus

- Organization and execution of web, network and mobile application vulnerability assessments, social engineering, red teaming exercises, incident responses and threat detection
- Internal Tool Development/Research:
 - Developed Phishing Attacks infrastructure (DNS/mail/web server) and Trojan orchestration software
 - Malware analysis /development (Microsoft Office Trojan with DNS exfiltration capabilities using VBA)

Cisco (Cloud Web Security) - Software Developer

Sep 15 - Oct 16 | London, UK

- Developed code for resilient big data distributed applications deployed in Mesos and Marathon for the Data Warehouse team
- Involved in developing malware scanning microservices for the Security team
- Worked with Java, Apache Storm and Kafka, Ansible and Docker

Capacitas - Junior Developer

Apr 14 - Sep 14 | UK

- Developed the Operational Capacity Management system
- Worked with concurrent Big Data processing with C# and the .NET Framework

Achievements and Awards

- [Bypassing Cloudflare WAF's SQL Injection filter](#); entry to HackerOne's Hall of Fame
- 2009 Scholarship supporting the UG studies from 'Cyprus State Scholarship Foundation' - based on academic grades (top 1%)
