

George Skouroupathis

Offensive Security Engineer · Penetration Tester

(+357) 99 121017 · george_skouroupathis@hotmail.com · astrocamel.com · Nicosia, Cyprus

OSCP and AWS Cloud Red Team certified offensive security engineer with 8+ years across web, cloud, network and mobile penetration testing, red teaming, social engineering, and offensive tool / malware development. Imperial College CS background — equally comfortable breaking systems and building the tooling to do it at scale.

EDUCATION

Imperial College London — MEng Computing with Artificial Intelligence

Sep 2011 – Jul 2015 · London, UK

Overall Grade: **First Class (70.4)**. Relevant courses: Software Engineering, Network Security, Advanced Databases, Machine Learning, Cryptography Engineering.

Kykkos A' Lyceum — Apolytirion 19.9 / 20

Sep 2006 – Jun 2009 · Nicosia, Cyprus

Key subjects: Computing, CISCO Networks (CCNA), Mathematics, Physics.

CERTIFICATIONS & TECHNICAL

OSCP — Offensive Security Certified Professional (since May 2017, ID OS-101-07493)

CARTS — Certified AWS Cloud Red Team Specialist (since June 2023, ID ARTL-9071)

Offensive: web/API, cloud (AWS) and network/mobile pentesting; red teaming; social engineering & phishing; source-code auditing; malware development

Engineering / DevOps: Python, TypeScript, Terraform, AWS, Docker, Ansible; CCNA networking

Languages: Greek (native), English (Full Professional Proficiency)

WORK EXPERIENCE – PROJECTS

Resonance Security — Senior Cybersecurity Engineer

Jan 2024 – Feb 2026 · Remote

- Led phishing campaigns and executed web, cloud, network and mobile penetration tests.
- Built the Resonance platform and offensive/monitoring tooling — phishing-campaign automation, asset monitoring, and an AI-powered anti-phishing browser extension.

Allendeaux — Senior Cybersecurity Engineer

Jun 2023 – Jan 2024 · Remote

- Executed web, cloud, network and mobile penetration tests with developer-ready remediation.
- Hardened **WebRTC and SIP** real-time communication stacks.

Halborn — Offensive Security Engineer

Feb 2022 – Jan 2023 · Remote

- Pentested and audited Web2 applications and AWS infrastructure as part of the Web & Cloud team.
- Specialized in **source-code audits of TypeScript apps and crypto-wallet browser extensions** — high-stakes review where a single missed bug meant direct financial loss.

Odyssey Cybersecurity — Senior Cybersecurity Analyst

Oct 2017 – Feb 2022 · Cyprus

- Executed web, network and mobile vulnerability assessments, social-engineering and red-team exercises, plus incident response and threat detection.
- Developed offensive tooling: **phishing infrastructure (DNS/mail/web servers) and trojan orchestration software**.
- Performed malware analysis and development — a Microsoft Office trojan with DNS-exfiltration capabilities via VBA.

Cisco (Cloud Web Security) — Software Developer

Sep 2015 – Oct 2016 · London, UK

- Developed resilient big-data distributed applications on Mesos/Marathon for the Data Warehouse team.
- Built **malware-scanning microservices for the Security team**.
- Stack: Java, Apache Storm, Kafka, Ansible, Docker.

Capacitas — Junior Developer

Apr 2014 – Sep 2014 · UK

- Developed the Operational Capacity Management system with concurrent big-data processing in C# / .NET.

ACHIEVEMENTS & AWARDS

- Bypassing Cloudflare WAF's SQL Injection filter — entry to **HackerOne's Hall of Fame**.
- 2009 Scholarship supporting UG studies from the Cyprus State Scholarship Foundation — based on academic grades (top 1%).
